

JUPITER 6.5S

UNDOK APP

JUPITER 6.5

OVERVIEW

Frontier Silicon's UNDOK™ app provides the most complete, versatile and easy-to-use multi-room controller for next generation connected audio systems.

The app offers comprehensive remote control functionality for FS based audio modules with an iOS or Android smart device. Dependent on the capabilities of the connected speaker it enables users to navigate between audio modes, browse content and control playback volume on standalone devices or multi-room groups. The application synchronises automatically with the speaker, so you can switch easily between using the speaker's controls and those of the UNDOK app.

LISTENING MODES

The Frontier UNDOK app gives you control over all the listening modes available on the Frontier Silicon based connected audio device. Modes available include:

- **Spotify Connect***
- **AirPlay**
- **Internet radio***
- **DLNA media playback***
- **USB device playback**
- **DAB/DAB+ digital radio**
- **FM with RDS (Radio Data System)**
- **Aux input***

SUPPORTED PLATFORMS

The app has been designed for iOS and Android smart devices to operate seamlessly with Frontier Silicon's connected audio solutions running IR 2.6 (and above) software and requires iOS 7 or Android 2.3 or later.

* modes supported in multi-room, more coming soon

MEDIA CONTROL

This highly innovative and easy to use application not only acts as a remote control to select available listening modes, control volume up/down, play, pause and EQ settings but also enables users to access and control the playback of their entire music library stored on any DLNA compliant device. Additionally it will also control the playback of music files from a USB memory stick plugged into the speaker.

CUSTOMISATION AND UPDATES

The app can be easily and quickly customised to reflect the brand image and look and feel of the end audio product and supports multiple languages including English and German.

Frontier Silicon works closely with customers to brand and customise all software for particular markets and end-products.
